LEGEND

1	What is the purpose of the study?	1. To determine the effect of the new drug on the disease.
2	What is the study design?	2. Randomized controlled trial.
3	What is the study population?	3. Patients with the disease.
4	What is the study intervention?	4. The new drug.
5	What is the study outcome?	5. The effect of the new drug on the disease.
6	What is the study hypothesis?	6. The new drug will have a positive effect on the disease.
7	What is the study significance?	7. The study will provide evidence for the use of the new drug.
8	What is the study limitation?	8. The study may be limited by the sample size.
9	What is the study conclusion?	9. The new drug has a positive effect on the disease.
10	What is the study recommendation?	10. The new drug should be used for the treatment of the disease.

NOTE: The study is a randomized controlled trial, which is the gold standard for evaluating the effectiveness of a new drug. The study population consists of patients with the disease, and the study intervention is the new drug. The study outcome is the effect of the new drug on the disease, and the study hypothesis is that the new drug will have a positive effect on the disease. The study significance is that the study will provide evidence for the use of the new drug, and the study limitation is that the study may be limited by the sample size. The study conclusion is that the new drug has a positive effect on the disease, and the study recommendation is that the new drug should be used for the treatment of the disease.
